

Should I remortgage?

Audio transcript

It's worth considering remortgaging if your current fixed rate mortgage deal is coming to an end and your current lender isn't offering a suitable new rate, you'd like to reduce your rate or mortgage term, you want to borrow more money or you want to find a better deal.

Moving your mortgage to a new lender could get you a better deal, reduce your monthly mortgage payments and lower the amount of interest you could pay over the mortgage term.
